

What to gather: info on:

agents = tobacco products

hosts = smoker

environment

Epidemiologic surveillance

also monitors health outcomes
and not only AES

Surveillance syst:

objectives

to define at early!

scope

methodology

characteristics

→ Exposure reduction - monitoring!
Identify new potential health risks
monitor disease rates/epidemics accurately
to probabilities of control groups!

Objectives:

- A. Monitor Exposure (Dose)
Unexpected, adverse effects
- B. short term behavioral
long term health consequences
Accuracy of dosimetry
Adverse effects

Intelligence

Data capture

Data man. & evaluation

Control
Plan

Data - Result communication
